● IMMER-CV Consortium

The IMMER-CV project brings together passionate experts to revolutionize the Cultural and Creative Sector. Led by **INNOPAC (Spain)** (innopac.org), pioneers in cultural innovation, and supported by **HYPERTECH (Greece)** (hypertech.gr), specialists in cutting-edge digital tools, we are building the future of immersive technology training. Stay with us as we redefine cultural experiences!

● Introducing IMMER-CV

IMMER-CV is an **Erasmus+ project** designed to empower professionals, trainers, and students in the **Cultural and Creative Sectors (CCS)** to effectively manage **immersive technologies**. Our focus is on equipping the CCS with the skills and knowledge required to harness the potential of immersive technologies, such as AR, VR, and others, to revolutionize cultural experiences. The project brings together experts from cultural heritage, performance art, and education to develop practical frameworks and innovative training tools.
